

# Functional, On-trend Ingredients for All Meat & Poultry Applications

The quality, taste, texture, and appearance of your meat products are our top priority. Here at Processor's Choice, we make it easier to create the delicious, high-quality, processed and alternative meat products your customers demand. Our selection includes **more than 1000 products**; we provide all the ingredients meat processors rely upon.

Tumbling, marinating or injecting pork, poultry, or beef? No matter the process, no matter the application, we have the ingredients you need to create the products your customers require.

Are you developing a new alternative meat product? We handle the plant proteins that appeal to consumers.

You need to feel confident you have the best solution for your latest product. With meat technologists on staff, we can help you identify the ideal ingredients. Process optimization, yield enhancement and formulation are our expertise! We supply 5 of the top 10 poultry producers and service more than 70 meat and poultry operations in the US.

With an average of more than 25 years in the meat industry, our experts know the importance of on-trend ingredients when it comes to meeting customers' expectations. Let us help with all your organic, non-GMO, and clean label needs.

## If it's important to you, it's important to us!

Consumer behaviors are changing the industry landscape. Cleaner labels, higher nutritional values, and perceived higher quality are no longer cutting-edge trends – they are mainstream requirements. We keep function, cost, and nutritional label concerns in mind when selecting the ingredients that we carry.

Whether you're reducing fat, removing phosphates & modified starches, or looking to reduce costs, we have the ingredients to meet your specifications.

## The right ingredients for your formulation:

- Flavor Stabilizers
- Flavor Enhancers
- Colors
- Binders
- Sweeteners
- Preservatives
- Sodium Replacers
- Anti-microbials
- Soy Proteins
- Seasonings, Spices, Herbs
- Rubs
- Glazes
- Marinades
